

HITCHING UP 10-POINT CHECKLIST

- 1 Wind up the corner steadies then reverse the tow vehicle until the tow ball is directly below the hitch
- 2 Connect the breakaway cable
- 3 Raise the hitch lever and lower the hitch head into place by winding in the jockey wheel
- 4 Check the indicator if using an AL-KO stabiliser
- 5 Wind the jockey wheel back down to see if it lifts the back of your vehicle
- 6 Wind the jockey wheel up all the way and stow
- 7 Lower the activator handle if fitted and check the indicator
- 8 Connect the electrics
- 9 Release the caravan handbrake
- 10 Check the lights work and adjust your towing mirrors
